

METAL FURNITURE  
KOVONAX

**ART OF METALWORKING**

## HISTORY & TRADITION

The company was founded by Robert Slezák in 1908. In 1911, one of the first manufacturers of metal furniture, the company began providing the surface layer of galvanized products composed of copper, nickel and chromium. The metal furniture was new to the market and unlike the produced by wooden furniture has become fashionable.

## PRESENT

At present the company Kovonax spol. s r. o., and re-branding of original centennial industrialization Slezákovy závody, focused primarily on the production of metal furniture for:

- arts & functionalism
- public service
- health & day care
- education and atypical interiors

The real Czech manufacturer from the initial processing of materials to the finished product. The advantage of all the products are safe and practical construction. Customers ensures reliability, quality of processing, easy manipulation and easy maintenance. Individual adjustments can be made according to customer requirements.
