The bedside cabinets are intended for use by patients on standard bed departments in the hospital, even for people using social services and care facilities.

Metal or LTD bedside cabinets located on the chassis with 4 swivel casters (2 front wheels are braked individually). The bedside cabinet has a small drawer for storing items of everyday use to a maximum weight of 3kg. At the bottom of the bedside cabinet is situated larger cabinet with shelves for storing of larger items (such as clothing). Metal bedside cabinet is equipped with retractable laminate and swivel dining board. The bedside cabinet made from LTD is equipped with retractable and swivel dining board from LTD.
